Statistics for Chalford (1 month from 2026-04-01 Amend)

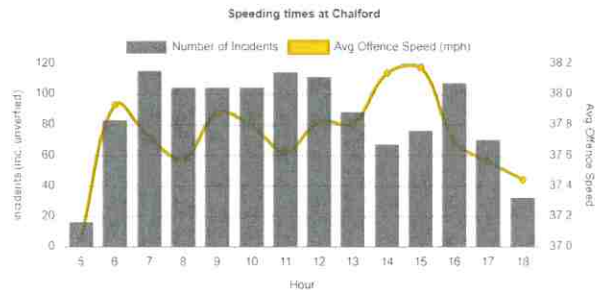

The figures presented are an add-on to the primary purpose of identification of offending vehicles, and are intended for comparison across locations. Derived from a combination of actual values and idealised model estimates, they come from incomplete data due to the restricted 'uptime' of solar powered Roadside Units. Please consider carefully given these limitations: if you want definitive volume statistics then we suggest using dedicated 24hr anonymous traffic logging devices (eg. rubber strip type).

Medium

Most figures are actual, but some are predicted based on actual. Predicted figures are estimated on normal Gaussian distribution of vehicle speeds (and volumes).
