Statistics for Chalford (1 month from 2025-11-01 [Amend](#))

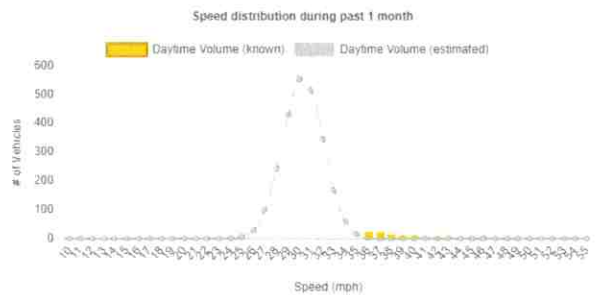

The figures presented are an add-on to the primary purpose of identification of offending vehicles, and are intended for comparison across locations. Derived from a combination of actual values and idealised model estimates, they come from incomplete data due to the restricted 'uptime' of solar powered Roadside Units. Please consider carefully given these limitations, if you want definitive volume statistics then we suggest using dedicated 24hr anonymous traffic logging devices (eg. rubber strip type).
